## Diswasher Resistance Tester

### Overview

Floor mounted tank to perform dishwasher resistance tests to BS EN 12875-4:2006

### Details

Floor mounted insulated tank, which can be supplied with either 3 or 6 test chambers for containing

detergent solution

Each container is fitted with a ware rack for easy handling of test samples

Tank is heated with 3 kw (3 place) or 2 x 3kw (6 place) immersion heater and supplemented by a circulation pump

Temperature is controlled to 77 deg C +/- 1 deg with a thermostat

The unit is supplied with a digital thermometer and automatic constant water level system.

To perform this test, you will also need

Detergent IEC436

Viewing cabinet fitted with daylight illumination (6500deg K) with D65 and D 652 light source

Linen cloth, 30cm Engineers rule

We also suggest that you consider a spares pack comprising:

3kw heating element & Circulatory pump
